### Stay connected to your healthy green garden

Cramer's newest robotic release – the RM2700 – has the ability to mow gardens of up to 2700 m<sup>2</sup> and manage slopes of up to 35 %. At just 57 dB it will be barely hearable for you and your neighbours which means the robotic can work in your garden at any time you choose. The simple height of cut adjustment is there to fit your needs: whether you like it short or longer and more natural - you can choose the perfect look for your lawn. You can differ between cutting lengths of 20 mm to 60 mm. Either way the concept of mowing your lawn more often and only cutting off little amounts of grass each time is very well known and will benefit in a healthier, greener, and thicker lawn. Other features of the RM2700 are the convenient cleaning due to an easily removable cover, the IPX5 water protection and rain and frost sensors to make sure the robotic only works under the right weather conditions. The mowing schedule then automatically delays until the conditions improve.

It also comes with several safety features such as GPS tracking, Geofence and with the Cramer Connect App as well as the current promotion of the connectivity subscription you will know where your robotic is, whether it mows and where or if there are any kinds of obstacles at any time. The Connectivity Subscription covers the costs of your subscription for the 2G / 4G SIM card for 12 years and is completely free in the promotion period from June 1<sup>st</sup> to December 31<sup>st</sup>, 2022. The SIM card is needed to operate the device's Control app.
